1. Date _______________

2. Page 1 of ______5______ pages: RECORDS AND REPORTS, IF ANY, ARE ATTACHED HERETO AND MADE A PART HEREOF

3. Property located at __1825 Perlich Ave. #201__, Red Wing, Goodhue, State of Minnesota.

4. NOTICE: Sellers of residential property, with limited exceptions, are obligated to satisfy the requirements of MN Statutes 513.52 through 513.60. To comply with the statute, Seller must provide either a written disclosure to the prospective Buyer (see Disclosure Statement: Seller’s Property Disclosure Statement) or satisfy one of the following two options. Disclosures made herein, if any, are not a warranty or guarantee of any kind by Seller or licensee(s) representing or assisting any party in this transaction and are not a substitute for any inspections or warranties the party(ies) may wish to obtain.

(Select one option only.)

1) □ QUALIFIED THIRD-PARTY INSPECTION: Seller shall provide to prospective Buyer a written report that discloses material information relating to the real property that has been prepared by a qualified third party. “Qualified third party” means a federal, state or local governmental agency, or any person whom Seller or prospective Buyer reasonably believes has the expertise necessary to meet the industry standards of practice for the type of inspection or investigation that has been conducted by the third party in order to prepare the written report.

   Seller shall disclose to prospective Buyer material facts known by Seller that contradict any information that is included in a written report, or material facts known by Seller that are not included in the report.

   The inspection report was prepared by ___________________________, and dated ________________.

   Seller discloses to Buyer the following material facts known by Seller that contradict any information included in the above referenced inspection report.

DISCLOSURE STATEMENT:
SELLER’S DISCLOSURE ALTERNATIVES

47. Page 2

OTHER REQUIRED DISCLOSURES:

NOTE: In addition to electing one of the above alternatives to the material fact disclosure, Minnesota law also
requires sellers to provide other disclosures to prospective buyers, such as those disclosures listed below.
Additionally, there may be other required disclosures by federal, state, local or other governmental entities
that are not listed below.

A. SUBSURFACE SEWAGE TREATMENT SYSTEM DISCLOSURE: (A subsurface sewage treatment system
disclosure is required by MN Statute 115.55.) (Check appropriate box.)

Seller certifies that Seller ☐ DOES ☒ DOES NOT know of a subsurface sewage treatment system on or serving
the above-described real property. (If answer is DOES, and the system does not require a state permit, see
Disclosure Statement: Subsurface Sewage Treatment System.)

☐ There is a subsurface sewage treatment system on or serving the above-described real property.
(See Disclosure Statement: Subsurface Sewage Treatment System.)

☐ There is an abandoned subsurface sewage treatment system on the above-described real property.
(See Disclosure Statement: Subsurface Sewage Treatment System.)

B. PRIVATE WELL DISCLOSURE: (A well disclosure and Certificate are required by MN Statute 103I.235.)
(Check appropriate box.)

☒ Seller certifies that Seller does not know of any wells on the above-described real property.
☐ Seller certifies there are one or more wells located on the above-described real property.
(See Disclosure Statement: Well.)

Are there any wells serving the above-described property that are not located on the property? ☐ Yes ☐ No
To your knowledge, is the property in a Special Well Construction Area? ☐ Yes ☐ No

C. VALUATION EXCLUSION DISCLOSURE: (Required by MN Statute 273.11, Subd. 18)

There ☐ IS ☒ IS NOT an exclusion from market value for home improvements on this property. Any valuation
exclusion shall terminate upon sale of the property, and the property's estimated market value for property tax purposes
shall increase. If a valuation exclusion exists, Buyers are encouraged to look into the resulting tax
consequences.

Additional comments:

D. FOREIGN INVESTMENT IN REAL PROPERTY TAX ACT ("FIRPTA"): Section 1445 of the Internal Revenue Code
provides that a transferee ("Buyer") of a United States real property interest must be notified in writing and must
withhold tax if the transferor ("Seller") is a foreign person and no exceptions from FIRPTA withholding apply.

Seller represents that Seller ☐ IS ☒ IS NOT a foreign person (i.e., a non-resident alien individual, foreign corporation,
foreign partnership, foreign trust, or foreign estate) for purposes of income taxation. This representation shall
survive the closing of any transaction involving the property described herein.

NOTE: If the above answer is "IS," Buyer may be subject to income tax withholding in connection with the
transaction (unless the transaction is covered by an applicable exception to FIRPTA withholding). In
non-exempt transactions, Buyer may be liable for the tax if Buyer fails to withhold.
If the above answer is "IS NOT," Buyer may wish to obtain specific documentation from Seller ensuring
Buyer is exempt from the withholding requirements as prescribed under Section 1445 of the Internal
Revenue Code.

Due to the complexity and potential risks of failing to comply with FIRPTA, including Buyer’s responsibility
for withholding the applicable tax, Buyer and Seller should seek appropriate legal and tax advice regarding
FIRPTA compliance, as the respective licensees representing or assisting either party will be unable to
assure either party whether the transaction is exempt from the FIRPTA withholding requirements.

DISCLOSURE STATEMENT:
SELLER'S DISCLOSURE ALTERNATIVES

95. Page 3

96. Property located at 1825 Perlich Ave. #201

97. Property located at 1825 Perlich Ave. #201

98. E. METHAMPHETAMINE PRODUCTION DISCLOSURE:
(A methamphetamine production disclosure is required by MN Statute 152.0275, Subd. 2 (m).)

99. [X] Seller is not aware of any methamphetamine production that has occurred on the property.

100. [ ] Seller is aware that methamphetamine production has occurred on the property.

101. (See Disclosure Statement: Methamphetamine Production.)

102. F. RADON DISCLOSURE:
(The following Seller disclosure satisfies MN Statute 144.496.)

103. RADON WARNING STATEMENT: The Minnesota Department of Health strongly recommends that ALL homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

104. Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling.

105. RADON IN REAL ESTATE: By signing this Statement, Buyer hereby acknowledges receipt of the Minnesota Department of Health’s publication entitled Radon in Real Estate Transactions, which is attached hereto and can be found at www.health.state.mn.us/divs/eh/indoorair/radon/rnrealestateweb.pdf.

106. A seller who fails to disclose the information required under MN Statute 144.496, and is aware of material facts pertaining to radon concentrations in the property, is liable to the Buyer. A buyer who is injured by a violation of MN Statute 144.496 may bring a civil action and recover damages and receive other equitable relief as determined by the court. Any such action must be commenced within two years after the date on which the buyer closed the purchase or transfer of the real property.

107. SELLER’S REPRESENTATIONS: The following are representations made by Seller to the extent of Seller’s actual knowledge.

108. (a) Radon test(s) [X] HAVE NOT occurred on the property.

109. (Check one.)

(b) Describe any known radon concentrations, mitigation, or remediation. NOTE: Seller shall attach the most current records and reports pertaining to radon concentration within the dwelling:

110. -----------------------------

111. -----------------------------

112. (c) There [X] IS NOT a radon mitigation system currently installed on the property.

113. (Check one.)

114. If “IS,” Seller shall disclose, if known, information regarding the radon mitigation system, including system description and documentation:

115. -----------------------------

116. -----------------------------

117. G. NOTICE REGARDING AIRPORT ZONING REGULATIONS: The property may be in or near an airport safety zone with zoning regulations adopted by the governing body that may affect the property. Such zoning regulations are filed with the county recorder in each county where the zoned area is located. If you would like to determine if such zoning regulations affect the property, you should contact the county recorder where the zoned area is located.

MN:DS:SDA-3 (8/15)
H. NOTICE REGARDING CARBON MONOXIDE DETECTORS:

MN Statute 299F.51 requires Carbon Monoxide Detectors to be located within ten (10) feet from all sleeping rooms. Carbon Monoxide Detectors may or may not be personal property and may or may not be included in the sale of the home.

I. WATER INTRUSION AND MOLD GROWTH: Studies have shown that various forms of water intrusion affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture leaving the home.

Examples of exterior moisture sources may be

- improper flashing around windows and doors,
- improper grading,
- flooding,
- roof leaks.

Examples of interior moisture sources may be

- plumbing leaks,
- condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- overflow from tubs, sinks or toilets,
- firewood stored indoors,
- humidifier use,
- inadequate venting of kitchen and bath humidity,
- improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- line-drying laundry indoors,
- houseplants—watering them can generate large amounts of moisture.

In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property. Therefore, it is very important to detect and remediate water intrusion problems.

Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health problems, particularly in some immunocompromised individuals and people who have asthma or allergies to mold.

To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the property inspected for moisture problems before entering into a purchase agreement or as a condition of your purchase agreement. Such an analysis is particularly advisable if you observe staining or any musty odors on the property.

For additional information about water intrusion, indoor air quality, moisture or mold issues, please view the Minnesota Association of REALTORS® Desktop Reference Guide at www.mnrealtor.com.

J. NOTICE REGARDING PREDATORY OFFENDER INFORMATION: Information regarding the predatory offender registry and persons registered with the predatory offender registry under MN Statute 243.166 may be obtained by contacting the local law enforcement offices in the community where the property is located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of Corrections web site at www.corr.state.mn.us.
DISCLOSURE STATEMENT:
SELLER’S DISCLOSURE ALTERNATIVES
181. Page 5

182. Property located at 1825 Perlich Ave. #201 Red Wing MN 55066

183. K. SELLER’S STATEMENT:

184. (To be signed at time of listing.)

185. Seller(s) hereby authorizes any licensee(s) representing or assisting any party(ies) in this transaction to provide
186. a copy of this Disclosure Statement to any person or entity in connection with any actual or anticipated sale of the
187. property. A seller may provide this Disclosure Statement to a real estate licensee representing or assisting a
188. prospective buyer. The Disclosure Statement provided to the real estate licensee representing or assisting a
189. prospective buyer is considered to have been provided to the prospective buyer. If this Disclosure Statement is
190. provided to the real estate licensee representing or assisting the prospective buyer, the real estate licensee must
191. provide a copy to the prospective buyer.

192. QUALIFIED THIRD-PARTY INSPECTION: If Seller has made a disclosure under the Qualified Third-Party
193. Inspection, Seller is obligated to disclose to Buyer in writing of any new or changed facts of which Seller is aware
194. that could adversely and significantly affect the Buyer’s use or enjoyment of the property or any intended use of
195. the property that occur up to the time of closing. To disclose new or changed facts, please use the Amendment to
196. Disclosure Statement form.

197. WAIVER: If Seller and Buyer agree to waive the seller disclosure requirement, Seller is NOT obligated to disclose
198. and will NOT disclose any new or changed information regarding facts.

199. OTHER REQUIRED DISCLOSURES (Sections A-F): Whether Seller has elected a Qualified-Third Party Inspection
200. or Waiver, Seller is obligated to notify Buyer, in writing, of any new or changed facts regarding Other Required
201. Disclosures up to the time of closing. To disclose new or changed facts, please use the Amendment to Seller’s

203. L. BUYER’S ACKNOWLEDGEMENT:

204. (To be signed at time of purchase agreement.)

205. I/We, the Buyer(s) of the property, acknowledge receipt of this Seller’s Disclosure Alternatives form and agree to
206. the seller’s disclosure option selected in this form. I/We further agree that no representations regarding facts have
207. been made, other than those made in this form. This Disclosure Statement is not a warranty or a guarantee of
208. any kind by Seller or licensee representing or assisting any party in the transaction and is not a suitable substitute
209. for any inspections or warranties the party(ies) may wish to obtain.
210. The information disclosed is given to the best of the Seller’s knowledge.

211. (Buyer) (Date) (Buyer) (Date)

212. LISTING BROKER AND LICENSEES MAKE NO REPRESENTATIONS HEREIN AND ARE
213. NOT RESPONSIBLE FOR ANY CONDITIONS EXISTING ON THE PROPERTY.

MN:DS:SDA-5 (8/15)
Radon in Real Estate Transactions

All Minnesota homes can have dangerous levels of radon gas in them. Radon is a colorless, odorless and tasteless radioactive gas that can seep into homes from the earth. When inhaled, its radioactive particles can damage the cells that line the lungs. Long-term exposure to radon can lead to lung cancer. About 21,000 lung cancer deaths each year in the United States are caused by radon, making it a serious health concern for all Minnesotans.

It does not matter if the home is old or new and the only way to know how much radon gas has entered the home is to conduct a radon test. MDH estimates 2 in 5 homes built before 2010 and 1 in 5 homes built since 2010 exceed the 4.0 pCi/L action level.

In Minnesota, buyers and sellers in a real estate transaction are free to negotiate radon testing and reduction. Ultimately, it is up to the buyer to decide an acceptable level of radon risk in the home. Prospective buyers should keep in mind that it is inexpensive and easy to measure radon, and radon levels can be lowered at a reasonable cost. The MDH Radon Program website provides more detailed information on radon, including the MDH brochure “Keeping Your Home Safe from Radon.”

The Minnesota Radon Awareness Act does not require radon testing or mitigation. However, many relocation companies and lending institutions, as well as home buyers, require a radon test when purchasing a house. The purpose of this publication is to educate and inform potential home buyers of the risks of radon exposure, and how to test for and reduce radon as part of real estate transactions.

Radon Facts

How dangerous is radon?
Radon is the number one cause of lung cancer in non-smokers and the second leading cause of lung cancer overall, next to tobacco smoking. Thankfully, much of this risk can be prevented through testing and taking action to reduce high levels of radon gas when and where they are found. Your risk for lung cancer increases with higher levels of radon gas, prolonged exposure and whether or not you are a smoker.

Where is your greatest exposure to radon?
Radon is present everywhere, and there is no known safe level. Your greatest exposure is where it can concentrate indoors and where you spend most of your time. For most Minnesotans, this is at home. Whether a home is old or new, well-sealed or drafty, with or without a basement, any home can have high levels of radon.

Where does Radon come from?
Radon comes from the soil. It is produced by the natural decay of uranium and radium commonly found in nearly all soils in Minnesota. As a gas, radon moves freely through the soil and eventually into the air you breathe. Our homes tend to draw soil gases, including radon, into the structure.

I have a new home, aren’t radon levels reduced already?
Homes built in Minnesota since June 2009 are required to contain construction features that may limit radon entry. These features are known as passive Radon Resistant New Construction (RRNC). While these passive RRNC features may lower the amount of radon in newer homes, it does not guarantee low levels. It is recommended all new homes be tested for radon, and if elevated levels are found, these passive RRNC features can be easily and inexpensively activated with the addition of a radon fan in the attic. If you are buying a new home, ask if the home has any RRNC features and if the home has been tested.

What is the recommended action based on my results?
If the average radon in the home is at or above 4.0 pCi/L, the house should be fixed. Consider fixing the home if radon levels are between 2 pCi/L and 3.9 pCi/L. While it isn’t possible to reduce radon to zero, the best approach is to reduce the radon levels to as low as reasonably achievable. Any amount of radon, even below the recommended action level, carries some risk.
How are radon tests conducted in real estate transactions?

Because of the unique nature of real estate transactions, involving multiple parties and financial interests, there are special protocols for radon testing.

**Radon Testing**

**House conditions when testing**

Be aware that any test lasting less than three months requires closed-house conditions.

**Closed-house Conditions:** Mean keeping all windows and doors closed, except for normal entry and exit.

**Before Testing:** Begin closed-house conditions at least 12 hours before the start of the radon test.

**During Testing:** Maintain closed-house conditions during the entire duration of the short term test. Operate home heating or cooling systems normally during the test.

**Where the test should be conducted**

Any radon test conducted for a real estate transaction needs to be placed in the lowest livable area of the home suitable for occupancy. In Minnesota, this is typically in the basement, whether it is finished or unfinished.

The test kit should be placed:

- two to six feet above the floor
- at least three feet from exterior walls
- four inches away from other objects
- in a location where it won’t be disturbed
- not in enclosed areas
- not in areas of high heat or humidity

If the house has multiple foundation types, it is recommended that each of these be tested. For instance, if the house has one or more of the following foundation types--basement, crawl space, slab-on-grade--a test should be performed in the basement and in at least one room over the crawlspace and one room with a slab-on-grade area.

**Who should conduct radon testing in real estate transactions?**

All radon tests should be conducted in accordance with national radon measurement protocols, by a certified and MDH-listed professional. This ensures the test was conducted properly, in the correct location, and under appropriate building conditions. A list of these radon measurement professionals can be found at MDH’s Radon web site. A seller may have previously conducted testing in a property. If the test result is at or above the action level, the home should be mitigated.

**Lowering radon in existing homes – Radon Mitigation**

When elevated levels of radon are found, they should be mitigated. Elevated radon concentrations can be easily reduced by a nationally certified and MDH-listed radon mitigation professional. A list of these radon mitigation professionals can be found at MDH’s Radon web site.

Radon mitigation is the process or system used to reduce radon concentrations in the breathing zones of occupied buildings. The goal of a radon mitigation system is to reduce the indoor radon levels to below the EPA action level of 4.0 pCi/L. A quality radon reduction (mitigation) system is often able to reduce the annual average radon level to below 2.0 pCi/L

Active sub-slab suction (also called sub-slab depressurization, or SSD) is the most common and usually the most reliable type of system because it draws radon-filled air from beneath the house and vents it outside. There are standards of practice that need to be followed for the installation of these systems. More information on radon mitigation can be found at the MDH Radon website.

**After a radon reduction system is installed**

Perform an independent short-term test to ensure that the reduction system is effective. Make sure the radon system is operating during the entire test. Once a confirmatory radon test shows low levels of radon in the home, be sure to retest the house every two years to confirm continued radon reduction.

**Contact the MDH Radon Program if you are uncertain about anything regarding radon testing or mitigation.**

The MDH Radon Program can provide:

- Information about radon health effects, radon testing and radon mitigation;
- Names of trained, certified and MDH-listed radon professionals;
- Information about radon health effects, radon testing and radon mitigation;
